

## Assignment 7, Lab 12:

In the Lab 12 file, there are 3 sections: the first section is Pre-Lab Visualization, this is on pages numbered 165 – 169; a Directed Lab Work section that is on pages 169 – 171; and a Post-Lab Follow-ups section that starts on page 171 and goes to the end of the document.

Your assignment is to work the Directed Lab Work section that is on pages 169 - 171. Modify the code files as specified and turn those into the dropbox on d2l. You will upload the 2 files needing modification, CountingGame.java and Primes.java, to the D2L dropbox. Don't upload any of the other files.

My recommendation is that you work the Pre-Lab section and answer those questions also, this will help with your understanding of how these sorting methods work. You do not need to turn in the Pre-Lab section.
